Profile

I create amazing designs. I make the web useful. I love what I do and so will you.

Experience

Web Designer/Creative Lead, American Heart Association

Dallas, Texas — 2002-Present

Design, develop and lead projects. You name it; I have done it. I have worn many hats and loved every minute of it. I have produced every thing from small, 2-page websites to large content management systems from start to finish - the full life cycle of a website. I have worked independently, and I have led a team of designers and user interface developers.

Design Contracts, From Various Companies

I have demos from various companies that I have worked for; just ask.

Education

Richland College, Richardson, Texas

Associates of Applied Science in Multimedia Web Design, Graduated 2003

Skills

What I Use: Photoshop, Coda, CSS Edit, Wordpress, JQuery...Flash (when I *really* need it). Javascript, HTML5 and CSS3. These aren't just acronyms, they are what I think about when I wake up in the morning to the time I hit the bed at night.

There are many other skills that might be too boring to list here, but the one that is most important to me is my ability to think outside the box and apply these skills in every project.

Referrals

Working with great people is my personal goal, but when great people like to work with you, that's just gravy on top. Everyone has a lot of good things to say about me and the project that I was involved in. Ask me for a list when you see me. They will be glad to hear from you.
